

Research shows that many small businesses are not aware of the opportunities and benefits of developing a resilient business.

As trusted advisors, accountants can help!

Surviving a Changing Climate: Accounting for Business Resilience

‘Hands-on’ workshops for accountants and financial advisors that want to ‘future proof’ their small business clients against extreme weather events and the impacts of a changing climate.

Reduce financial, operational and environmental impact costs by:

- ✓ Assessing level of risk and resilience
- ✓ Planning and identifying safeguarding actions
- ✓ Adopting cost-effective solutions to protect the business

Explore business opportunities by:

- ✓ Assessing how a business may need to change
- ✓ New product or service opportunities

After the Workshop, delegates will be able to offer the following to their clients:

- A risk assessment and framework for a business resilience action plan
- Advice and guidance on improving resilience
- Signpost clients to local support and help

Cost: £50+VAT Light refreshments are included.
